

Fun in the Sun

POINTS OF INTEREST ★ SUMMER CAMP ★ SESSION 5: PINT-SIZED SCIENTISTS

“THE SCIENCE OF FUN”

Our two week science theme was explosion free, but full of “mad” fun nonetheless. The children loved a field trip to The Works, a hands-on science museum where they got to play a stringless harp, operate remote controlled machines, and test the strength of fortresses made of foam blocks.

During the second week, we were visited by Tracy from “Mad Science.”

The children were enthralled as Tracy showed us the properties of cohesion and repulsion by dripping dish soap into tins filled with milk and food coloring. Later, we brought the laboratory outside and asked our young scientists to hypothesize about the interaction between mentos and diet coke. Their predictions proved accurate as coke geyser erupted.
